### SEASONALLY ADJUSTED INDICATORS

Pages 4-8 of this publication contain a series of original and seasonally adjusted statistical indicators of Australian economic activity, representative of unadjusted series presented elsewhere in the publication. Details of the methods used in seasonally adjusting these and other series are given in *Seasonally Adjusted Indicators 1967*, issued by this Bureau on 18 July 1967, which contains original and seasonally adjusted data in tabular and graphical form for forty-eight selected series. The seasonally adjusted indicators included therein will be up-dated in relevant monthly and quarterly publications of this Bureau.

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Review have been adjusted for the effects of some calendar irregularities, namely: 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of moveable holidays, i.e. Easter and Australia Day. The adjustments made to each series are indicated in Appendix B of *Seasonally Adjusted Indicators 1967*.

The 'indicator' headings on pages 4-8 show the page numbers of the relevant series, which should be referred to for further information on the nature of the series and for further statistical detail.

## POPULATION: STATES

A new series of State population estimates has been introduced from 30 September 1961 (see Australian Demographic Review No. 236 for explanation of method used). The series has been adjusted in accordance with the preliminary results of the 1966 Census. Further adjustments will be made when the final results of the Census become available for all States and Territories.

## OVERSEAS ARRIVALS AND DEPARTURES

*Permanent movement*—persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad.

*Long-term movement*—arrival of visitors and temporary departure of residents with the stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more, and the departure of visitors and return of Australian residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

*Short-term movement*—all other overseas arrivals and departures, including those of Australian troops irrespective of period of stay.

Crew members, persons passing through Australia on board the same ship or on the same flight (variously called direct transit passengers or 'through' passengers) and passengers on a short pleasure cruise commencing and finishing in Australia on a ship not then engaged in a regular voyage, are excluded from these statistics.

(a) The figures in this table, except those relating to government employees, are based on comprehensive data from the Population Censuses of June 1954 and June 1961. Estimates for months subsequent to June 1961 are derived from current Pay-roll Tax returns, returns of Government employment, other direct records of employment, and estimates of the number of employees not covered by these collections. The figures are not directly comparable with statistics derived from the 1966 Population Census, for which new work force definitions were adopted. Figures have been revised from July 1965 onwards. For further details see August issue of the bulletin *Employment and Unemployment*.

(b) Includes employees engaged in selling and distribution, etc., as well as those occupied directly in manufacturing activity. (c) Includes Law and Order; Religion and Social Welfare; Health Services; Education; and Other Community and Business Services. (d) Includes Forestry, Fishing and Trapping; Mining and Quarrying; Electricity, Gas, Water and Sanitary Services; and Communication. (e) Affected by industrial disputes.

# VALUE OF RETAIL SALES (a): COMMODITY GROUPS\*

Figures are on a basis comparable with the 1961-62 Retail Census. The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainments, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the year 1961-62 are derived from a census taken in respect of that year, whereas other figures are estimates made by means of sample surveys.

## WHOLESALE TRADE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, goods sold by wholesale in Australia including imports are taxable. The returns do not relate to all wholesale trades as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

(a) Owing to insufficient information it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles and all such machinery is treated as capital equipment whether imported in an assembled or unassembled condition. (b) Includes replacement parts, completely knocked-down vehicles and components for the assembly of motor vehicles. (c) Excludes a percentage for piece-goods to be sold by retail and paper to be used solely for wrapping which are recorded in classes VI. E-J and III, respectively. (d) Excludes crude petroleum which is included in class I. C. (1-4). (e) Includes a percentage for paper used solely for wrapping, see note (c). (f) Includes H.M.A.S. 'Perth'. (g) Includes H.M.A.S. 'Hobart'.

## EXPORT PRICE INDEX

The table below sets out Export Price Index numbers on the reference base: Year 1959-60 = 100. A full description of the index and its relationship with the previous index is given in Commonwealth Year Book No. 52, 1966. Index numbers of the previous Export Price Index, converted to the base: Year 1959-60 = 100, are set out on page 27.

(Base of each Index: Year 1959-60 = 100)

(a) These indexes are calculated largely by a direct revaluation at base year prices of quantities of goods exported and imported, or where this is impracticable, by dividing values by appropriate price indexes. (b) Excludes gold. (c) Excludes machinery.

# WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have in the main been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. The weighing system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive. Work is proceeding on the preparation of new series of wholesale price index numbers. Meanwhile, the present series continue to be compiled on their existing basis, which has become increasingly affected by changes in usage, changes of category as between 'imported' and 'home-produced' for some commodities, and changes in industrial structure.

## PRICE INDEXES: VARIOUS COUNTRIES

(Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations.)

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

### WHOLESALE PRICE INDEXES

The items priced and the levels at which they are priced in these indexes vary widely according to the intended purposes of the indexes of the various countries.

## SHARE PRICE INDEX

This index relates to ordinary shares of the principal companies (excluding banks) listed on the Sydney Stock Exchange, and whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per \$2 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. The total index is the average of all the shares included in the groups with the addition of thirty-four miscellaneous shares.

(a) Weighted averages of minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and agreements. Excludes rural. (b) Awards of or agreements registered with the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator. (c) Awards or determinations of, or agreements registered with, State industrial tribunals, and certain unregistered agreements. (d) Because of differences in the coverage and the method of weighting, these rates differ from the 'Six Capitals' Commonwealth basic wage rates shown on page 35. (e) Margins are minimum amounts, in addition to the basic wage, prescribed in awards etc., as payable to particular classifications for skill, experience, arduousness and other like factors. (f) Loadings are minimum amounts, in addition to the basic wage and margin (if any), awarded for various kinds of disabilities associated with the performance of work, or to meet particular circumstances. They include payments such as industrial loadings and other general loadings prescribed in awards, etc., for the occupations included in the Minimum Wage Rate index. (g) The sum of components may not add to figure shown is total.

(a) Rates are operative from the beginning of the first pay-period commencing in the month shown or commencing on or after the date shown. (b) Basic Wage for adult females 75 per cent of adult male rate. (c) Automatic quarterly adjustments in accordance with variations in retail price index numbers discontinued. (d) Rates declared subsequent to an inquiry. (e) Automatic quarterly adjustments in accordance with variations in retail price index numbers, operated until May 1964. (f) Rates same as for Commonwealth basic wage rates. (g) See Special Note below.

**Special Note.** The latest **Commonwealth** rates shown in the above table applied before the decision of the Commonwealth Conciliation and Arbitration Commission in June 1967 to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Total wages for adult males and adult females were to be increased by \$1 a week from the same date.

Subsequent to the above increases in Commonwealth awards, **State** award wages were also increased as follows. In **New South Wales** award rates of wages and salaries for adult males and adult females were increased by the addition of a fixed loading of \$1 per week described as 'July 1967 economic loading' to take effect from the beginning of the first pay-period to commence on or after 1 July 1967. In **Victoria** wage rates for adult males and females in most Wages Board determinations were increased by \$1 a week from 1 July 1967. Basic wages and margins were deleted from determinations and wage rates expressed as total wages. In **Queensland** award rates of pay for both adult males and adult females were increased by \$1 a week to operate from 3 July 1967. In **South Australia** the living (basic) wages for both adult males and adult females were increased by \$1 per week to operate from 3 July 1967. In **Western Australia** the Industrial Commission decided that the minimum weekly wage payable to adult male workers under certain awards would be increased from \$36.55 to \$37.55; that wage rates for adult workers not in receipt of the minimum wage would be increased by 60 cents per week; and that these increases operate from the beginning of the first pay-period commencing on or after 1 July 1967. In **Tasmania** the chairman of the Wages Boards announced on 4 July that a \$1 per week increase in basic wage rates for adult males and adult females would be incorporated in Wages Board determinations beginning in July 1967.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (b) Total wages and salaries, etc., divided by the total number of civilian employees expressed in male units, i.e., total male employees plus 55 per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) All industries/Australia, base 1953-54 = 100. There has been no change in the basis of seasonal adjustment of this series. It has not yet been adjusted by the programs used for other Bureau series (see pages 4-8).

Note. Quarterly figures are affected by seasonal influences. Comparisons as to trend are generally best made by relating complete years or corresponding periods of incomplete years. However, from December quarter 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks.

## CAPITAL EXPENDITURE BY PRIVATE BUSINESSES

These statistics are designed primarily to measure trends in expenditure by private businesses on fixed tangible assets. The statistics are based on returns obtained from private businesses subject to pay-roll tax (other than businesses in rural, professional, gas and electricity industries), from government banks and airlines, and from other businesses not subject to pay-roll tax which undertake projects of more than \$500,000 in any half year. For statistics of capital expenditure by all private businesses, see the series 'Gross Fixed Capital Expenditure' on page 55 of this publication.

# INDUSTRIAL PRODUCTION INDEXES: VARIOUS COUNTRIES

(Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations.)

Unless otherwise stated, the indexes shown below include mining, manufacturing, electricity and manufactured gas but exclude construction. When the indexes are adjusted for differences in the number of working days per month or for seasonal variations they are footnoted accordingly. A short dash on each side of an index number (e.g., -95-) indicates that two series have been linked at that period.

## SHIPPING CARGOES

Part of the cargo is recorded in tons weight and part in tons measurement. As the total cannot be stated accurately as either tons weight or tons measurement, each is recorded and published separately; 1 'ton measurement' equals 40 cubic feet.

## NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

The following statistics show the net amount of cash transferred from the investing public to companies in Australia through the types of capital specified. For this purpose the 'investing public' includes banks and life insurance companies (except when subscribing to issues by associated companies) and superannuation funds. The statistics do not include changes in bank overdraft, loans to authorised dealers in the short-term money market, or deposits accepted by banks, insurance companies, pastoral companies or building societies.

(a) See footnote (a) page 59. (b) This series has been compiled from information supplied by the major trading banks as at second Wednesday of each month. Prior to July 1962, the series covered all new and increased lending commitments entered into by banks which require the approval of a formal limit on a customer's overdraft account. Commitments in respect of temporary advances to woolbuyers and in respect of term loans were excluded. As from July 1962, the series has been extended to include new commitments in respect of the term lending arrangements established in mid-April 1962. The figures represent gross new lending commitments of banks and do not take account of cancellations and reductions of existing limits. Figures for cancellations and reductions of existing limits can be estimated from this series (after deducting term loan and farm development loan components and adjusting the weekly average to a monthly basis) in conjunction with that of overdraft limits. However, such estimates should be regarded as an approximation only, since there are unavoidable differences in the basis of compilation of the two series. (c) Excludes limits in respect of temporary advances to woolbuyers and term loans, (d) Year ended second Wednesday of July.

## FINANCE COMPANIES

The following new series of statistics cover the main types of lending by Finance Companies in Australia, including Instalment Credit for Retail Sales, Wholesale Hire Purchase, Other Consumer and Commercial Loans (comprising personal loans, mortgage loans and commercial loans and advances) and Factoring. These statistics were first published in February 1966 in the bulletin 'Finance Companies', July 1964 to October 1965, which also contains information on the scope of the new statistics and definitions of the items. The 'Finance Companies' covered in the statistics given below, in so far as they provide instalment credit for retail sales, are also included in the statistics 'Instalment Credit for Retail Sales' (pages 18-20).

(a) Figures for N.S.W. represent combined transactions of Consolidated Revenue Fund and Business Undertakings—Railways, Tramways, Omnibuses and Sydney Harbour Trust Section of Maritime Services Board—included in annual Budget Papers. Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payment to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of States grants (financial assistance), the interest on State debts, special grants, special financial assistance, grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
